Mode of Operation

Max. and/or min. control of solid, fluid or granulated substances, e.g. sand, gravel, sugar or chemicals.

SV 150/250: Relay control of DISCHARGING

SV 160/260: Relay control of CHARGING

Example 1

The diagram shows the level control connected as max. and min. control, i.e. registration of 2 levels during charging (discharging).

The relay releases (operates) when the max. sensor is in contact with the substance,

provided that the min. sensor is immersed. The relay operates (releases) when the min. sensor is no longer in contact with the substance.

Example 1

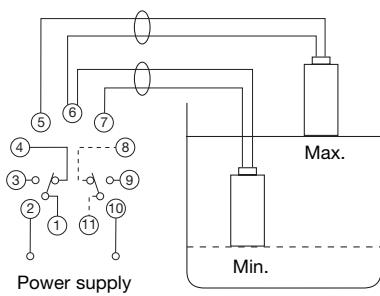

The diagram shows the level control connected as max. or min. control, i.e. registration

of 1 level during charging (discharging).

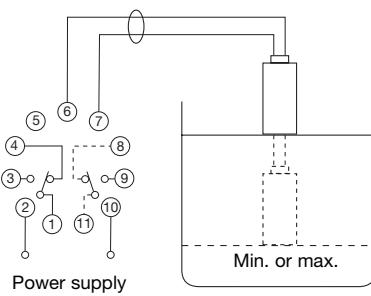

The relay releases (operates) when the sensor is in contact with the substance.
