HIGH-SIDE AND LOW-SIDE GATE DRIVER IN SO-8

Description

The DGD2005 is a mid-voltage/high-speed gate driver capable of driving N-channel MOSFETs in a half-bridge configuration. High-voltage processing techniques enable the DGD2005's high-side to switch to 200V in a bootstrap operation. The 30ns (maximum) propagation delay matching between the high-side and low-side drivers allows high-frequency switching.

The DGD2005 logic inputs are compatible with standard TTL and CMOS levels (down to 3.3V) to interface easily with controlling devices. The driver outputs feature high-pulse current buffers designed for minimum driver cross conduction. The low-side gate driver and logic share a common ground.

The DGD2005 is available in a space saving SO-8 package and operates over an extended -40°C to +125°C temperature range.

Applications

- Battery Power Tools and Appliances
- Light Electric Vehicles (LEV)
- Inverters

Features

- Floating High-Side Driver in Bootstrap Operation to 200V
- Drives Two N-Channel MOSFETs in Half Bridge Configuation
- 290mA Source/600mA Sink Output Current Capability
- Outputs Tolerant to Negative Transients
- Wide Logic and Low-Side Gate Driver Supply Voltage: 10V to 20V
- Logic Input (HIN and LIN) 3.3V Capability
- Schmitt Triggered Logic Inputs with Internal Pull Down
- Delay Matching of 30ns Maximum
- Undervoltage Lockout for High-Side and Low-Side Drivers
- Extended Temperature Range: -40°C To +125°C
- **Totally Lead-Free & Fully RoHS Compliant (Notes 1 & 2)**
- **Halogen and Antimony Free. "Green" Device (Note 3)**
- **For automotive applications requiring specific change control (i.e. parts qualified to AEC-Q100/101/200, PPAP capable, and manufactured in IATF 16949 certified facilities), please contact us or your local Diodes representative. https://www.diodes.com/quality/product-definitions/**

Mechanical Data

- Case: SO-8 (Type TH)
- Case Material: Molded Plastic. "Green" Molding Compound. UL Flammability Classification Rating 94V-0
- Moisture Sensitivity: Level 3 per J-STD-020
- Terminals: Finish — Matte Tin Plated Leads. Solderable per MIL-STD-202, Method 208 e3
- Weight: 0.075 grams (Approximate)

LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

A. Life support devices or systems are devices or systems which:

1. are intended to implant into the body, or

2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.

B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.
