EP Cores (6595130121)

Part Number: 6595130121

95 EP CORE SET

EP designs reduce the effect of residual air gap upon the effective permeability of the core, hence they minimize coil volume for a given inductance. EP cores also provide a high degree of isolation from adjacent components and are advantageously used in low power devices, matching and broadband transformers.

 \Box EP cores can be supplied with the center post gapped to a mechanical dimension or an A₁ value.

Weight indicates is per pair or set.
