## HARTING News 2013

## Transforming customer wishes into concrete solutions

The HARTING Technology Group is skilled in the fields of electrical, electronic and optical connection, transmission and networking, as well as in manufacturing, mechatronics and software creation. The Group uses these skills to develop customized solutions and products such as connectors for energy and data transmission applications including, for example, mechanical engineering, rail technology, wind energy plants, factory automation and the telecommunications sector. In addition, HARTING also produces electro-magnetic components for the automobile industry and offers solutions in the field of Enclosures and Shop Systems.

The HARTING Group currently comprises 36 subsidiary companies and worldwide distributors employing a total of approximately 3,500 staff.

#### We aspire to top performance.

Connectors ensure functionality. As core elements of electrical and optical wiring, connection and infrastructure technologies, they are essential in enabling the modular construction of devices, machines and systems across a very wide range of industrial applications. Their reliability is a crucial factor guaranteeing smooth functioning in the manufacturing area, in telecommunications, applications in medical technology – in fact, connectors are at work in virtually every conceivable application area. Thanks to the consistent further development of our technologies, customers enjoy investment security and benefit from durable, long term functionality.

#### Always at hand, wherever our customers may be.

Increasing industrialization is creating growing markets characterized by widely diverging demands and requirements. The search for perfection, increasingly efficient processes and reliable technologies is a common factor in all sectors across the globe.

HARTING is providing these technologies – in Europe, America and Asia. The HARTING professionals at our international subsidiaries engage in close, partnership based interaction with our customers, right from the very early product development phases, in order to realize customer demands and requirements in the best possible manner.

HARTING Subsidiary company

HARTING Representatives

Our people on location form the interface to the centrally coordinated development and production departments. In this way, our customers can rely on consistently high, superior product quality – worldwide.

#### Our claim: pushing performance.

HARTING provides more than optimally attuned components. In order to serve our customers with the best possible solutions, HARTING is able to contribute a great deal more and play a closely integrative role in the value creation process.

From ready assembled cables through to control racks or ready-to-go control desks: Our aim is to generate the maximum benefits for our customers – without compromise!

#### Quality creates reliability – and warrants trust.

The HARTING brand stands for superior quality and reliability – worldwide. The standards we set are the result of consistent, stringent quality management that is subject to regular certifications and audits.

EN ISO 9001, the EU Eco-Audit and ISO 14001:2004 are key elements here. We take a proactive stance to new requirements, which is why HARTING ranks among the first companies worldwide to have obtained the new IRIS quality certificate for rail vehicles.

**HARTING technology creates added value for customers.** Technologies by HARTING are at work worldwide. HARTING's presence stands for smoothly functioning systems, powered by intelligent connectors, smart infrastructure solutions and mature network systems. In the course of many years of close, trust-based cooperation with its customers, the HARTING Technology Group has advanced to one of the worldwide leading specialists for connector technology. Extending beyond the basic functionalities demanded, we offer individual customers specific and innovative solutions. These tailored solutions deliver sustained effects, provide investment security and enable customers to achieve strong added value.

**Opting for HARTING opens up an innovative, complex world of concepts and ideas.**

In order to develop connectivity and network solutions serving an exceptionally wide range of connector applications and task scopes in a professional and cost optimized manner, HARTING not only commands the full array of conventional tools and basic technologies. Over and beyond these capabilities, HARTING is constantly harnessing and refining its broad base of knowledge and experience to create new solutions that ensure continuity at the same time. In securing this know-how lead, HARTING draws on a wealth of sources from both in-house research and the world of applications alike.

Salient examples of these sources of innovative knowledge include microstructure technologies, 3D design and construction technology, as well as high temperature

or ultrahigh frequency applications that are finding use in telecommunications or automation networks, in the automotive industry, or in industrial sensor and actuator applications, RFID and wireless technologies, in addition to packaging and housing made of plastics, aluminum or stainless steel.

**HARTING solutions extend across technology boundaries.** Drawing on the comprehensive resources of the group's technology pool, HARTING devises practical solutions for its customers. Whether this involves industrial networks for manufacturing automation, or hybrid interface solutions for wireless telecommunication infrastructures, 3D circuit carriers with microstructures, or cable assemblies for high-temperature applications in the automotive industry - HARTING technologies offer far more than components, and represent mature, comprehensive solutions attuned to individual customer requirements and wishes. The range covers ready-to-use cable configurations, completely assembled backplanes and board system carriers, as well as fully wired and tested control panels.

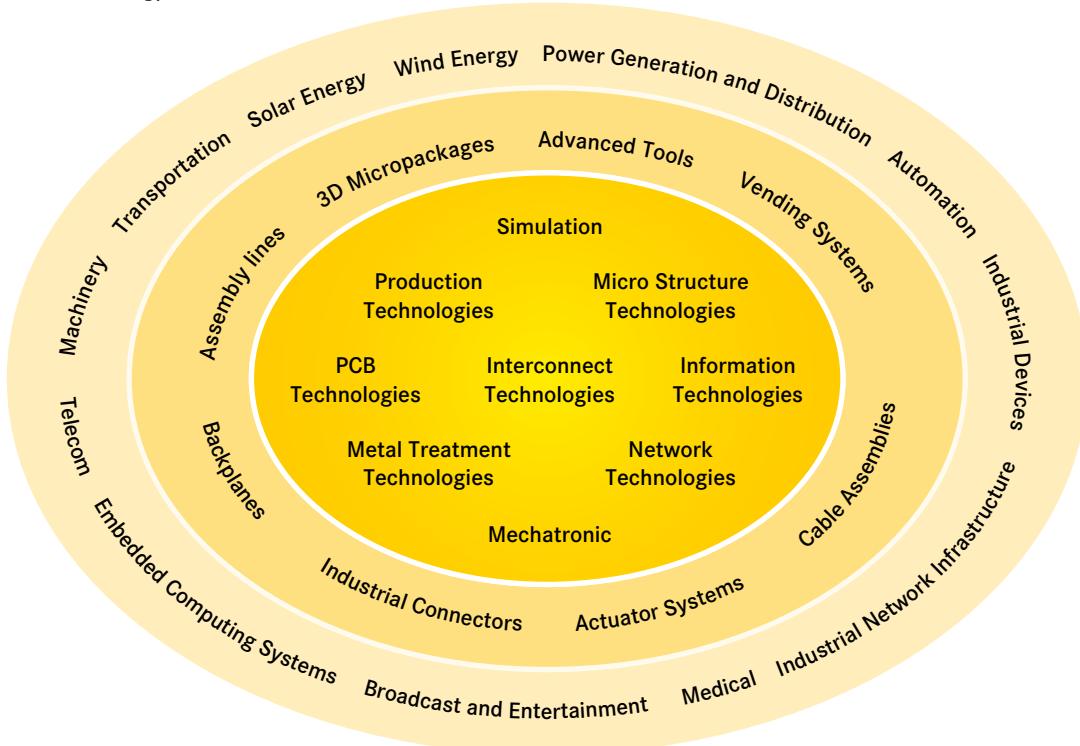

In order to ensure the future proof design of RF- and EMC-compatible interface solutions, the central HARTING laboratory (certified to EN 45001) provides simulation tools, as well as experimental, testing and diagnostics facilities all the way through to scanning electron microscopes. In the selection of materials and processes, lifecycle and environmental aspects play a key role, in addition to product and process capability considerations.

## HARTING knowledge is practical know-how generating synergy effects.

HARTING commands decades of experience with regard to the applications conditions of connectors in telecommunications, computer and network technologies and medical technologies, as well as industrial automation technologies, such as the mechanical engineering and plant engineering areas, in addition to the power generation industry or the transportation sector. HARTING is highly conversant with the specific application areas in all of these technology fields.

The key focus is on applications in every solution approach. In this context, uncompromising, superior quality is our hallmark. Every new solution found will invariably flow back into the HARTING technology pool, thereby enriching our resources. And every new solution we go on to create will draw on this wealth of resources in order to optimize each and every individual solution. In this way, HARTING is synergy in action.

## Notes

## Description

Han® High Temp is a new product series that is based on our well-established Han® B and Han® E series. We used high-quality materials with wide temperature ranges to produce connectors that are uniquely suited for a wide variety of applications.

These connectors can withstand temperatures up to 200 °C – so they can be used directly in machines and facilities that would otherwise require cumbersome and complex constructions.

For our users, this delivers direct advantages:

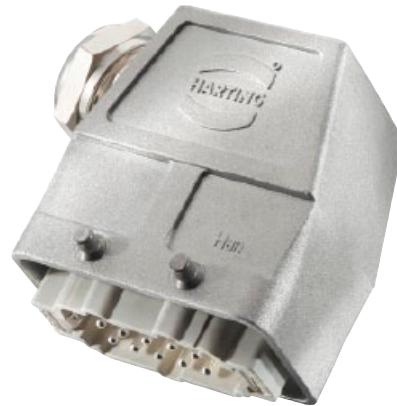

- The electro-mechanical design process is optimized.  
Machine parts which are exposed to high temperatures can be designed modularly.
- The work process is optimized  
since lower wiring complexity results in reduced maintenance costs.
- The after-sales phase is optimized  
because this more service-friendly approach results in less outages and down times.

## Design overview

The basic structure of the Han® High Temp connector consists of a bulkhead mounted housing and a cable-side hood.

Hoods and housings:

The aluminium die-cast hoods and housings feature a highly compressed surface with excellent non-stick properties. It also has a special non-stick coating on the bulkhead-side seal which allows easy handling without significant sticking.

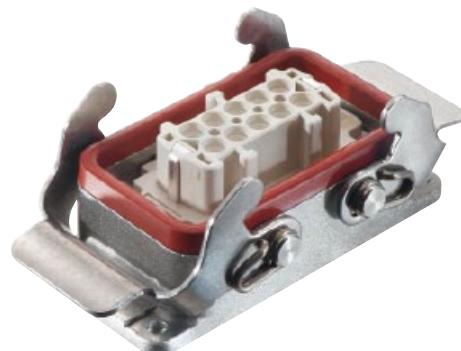

Inserts:

The Han® High Temp series features very rugged contact inserts, which are really the heart of any connector. The LCP injection-moulded insert delivers outstanding temperature resistance coupled with excellent mechanical stability.

Contacts:

Our new temperature resistant contacts, for either screw or crimp terminations, ensure reliable connections with minimal contact resistance even at extreme temperatures.

**Han® High Temp connectors  
remain robust and reliable for their entire lifespan!**

## Features

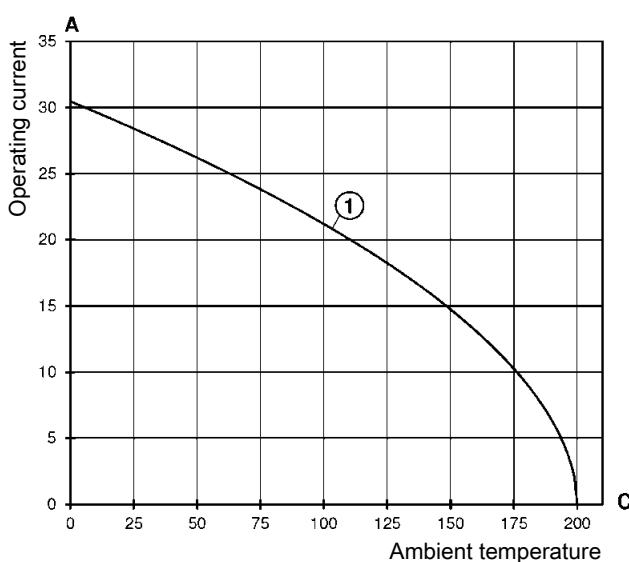

- Reliable also at extreme temperatures up to 200 °C
- All piece parts (contacts, insert material, hoods and housings, seals and grounding elements) are designed in a temperature resistant way
- Developed on the basis of the proven Han® E series for 6, 10, 16 or 24 contacts
- Electrical data for 16 A and 400 V

## Technical characteristics

|  |                                  |
|--|----------------------------------|
| Specifications                             | DIN EN 60 664-1<br>DIN EN 61 984 |

| Number of contacts                         | 6, 10, 16, 24 + PE               |
| Electrical data<br>acc. to EN 61 984       | <b>16 A 400 V 6 kV 3</b>         |
| Rated current                              | 16 A                             |
| Rated voltage                              | 400 V                            |
| Rated impulse voltage                      | 6 kV                             |
| Pollution degree                           | 3                                |
| Insulation resistance                      | $\geq 10^{10} \Omega$            |
| Material                                   | LCP                              |
| Limiting temperatures                      | -40 °C ... +200 °C               |
| Flammability acc. to UL 94                 | V 0                              |
| Mechanical working life<br>- mating cycles | $\geq 500$                       |

## Current carrying capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature. Measuring and testing techniques according to DIN EN 60 512-5

① wire gauge: 2.5 mm<sup>2</sup>

## Contacts

## Features

- High construction
- Large cabling space
- Cable entry with optimised 30° angle
- Compatible to all standard hoods and housings

## Technical characteristics

|  |                    |

Available Juli 2013

## Features

- Compatible to all standard hoods/housings
- Approved lever locking system with Han-Easy Lock®
- Standard panel cut out
- Degree of protection IP 66 and IP 67
- No sliding off the seal due to the protective flange

## Technical Characteristics

Han® Standard Hoods/Housings  
Metal hoods/housings for industrial applications

## Notes

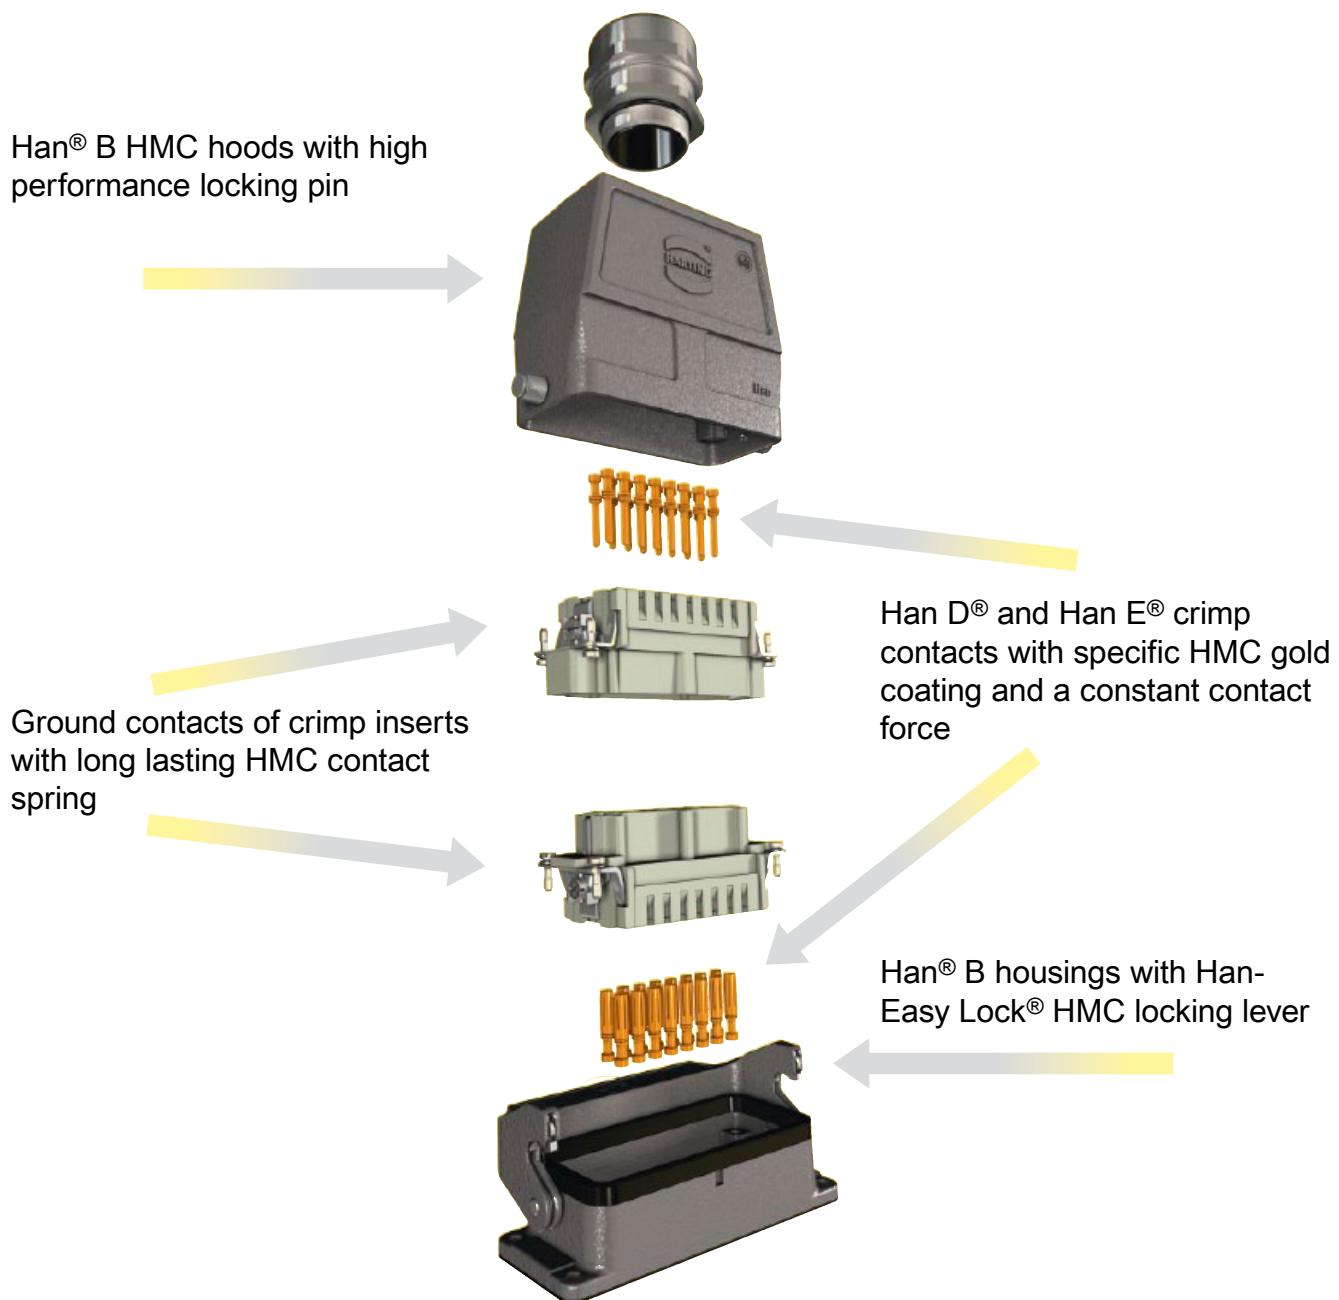

## Features

This series Han® HMC (High Mating Cycles) is a connector series specifically aiming at industrial applications for 10,000 mating cycles.

Benefits:

- High mechanical robustness
- Simple and easy understandable design
- Optimized concept for signal and power transmission
- Low mating and unmating forces
- High contact density

## General Description

## Technical characteristics

### Hoods/Housings Han B® HMC

|   |                                  |
|---|----------------------------------|
| Material  | aluminium die-cast               |
| Surface   | powder coated<br>RAL 7037 (grey) |
| Locking element   | Han-Easy Lock® HMC               |
| Flammability acc. to UL 94  | V 0                              |
| Hoods/Housings seal   | NBR                              |
| Limiting temperatures   | -40 °C ... +125 °C               |
| Degree of protection acc. to DIN EN 60 529<br>for coupled connector | IP 65                            |

Selection of hoods housings see page 53

### Contacts Han D® HMC

|                      |                          |
|----------------------|--------------------------|
| Material             | copper alloy             |
| Surface              | HMC gold plating         |
| Contact resistance   | $\leq 3 \text{ m}\Omega$ |
| Crimp terminal - min | 0.14 mm² / AWG 26        |
| Crimp terminal - max | 2.5 mm² / AWG 14         |

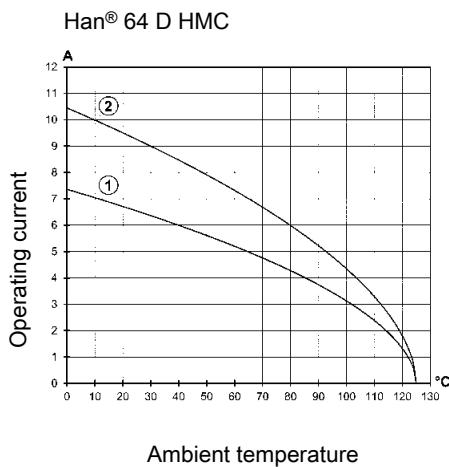

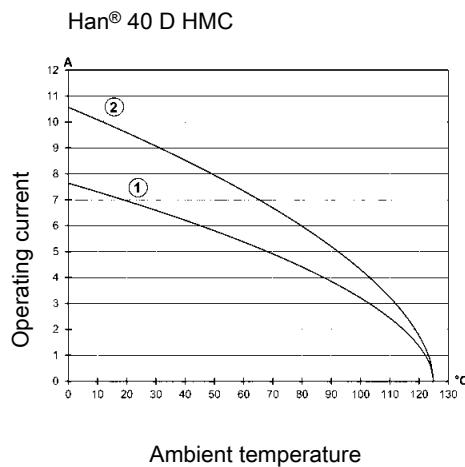

## Features

- High density contacts / connector
- For requirements up to 250 V / 10 A
- Time saving rapid termination by use of crimping contacts
- Suitable for hoods/housings of series Han® B HMC
- Han D® HMC contacts available with special HMC gold plating for 10,000 mating cycles

## Current carrying capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

Measuring and testing techniques according to DIN EN 60 512-5

- ①  $0.75 \text{ mm}^2$
- ②  $1.5 \text{ mm}^2$

## Contacts Han E® HMC

|                      |                          |
|----------------------|--------------------------|
| Material             | copper alloy             |
| Surface              | HMC gold plated          |
| Contact resistance   | $\leq 1 \text{ m}\Omega$ |
| Crimp terminal - min | 0.14 mm² / AWG 26        |
| Crimp terminal - max | 4 mm² / AWG 12           |

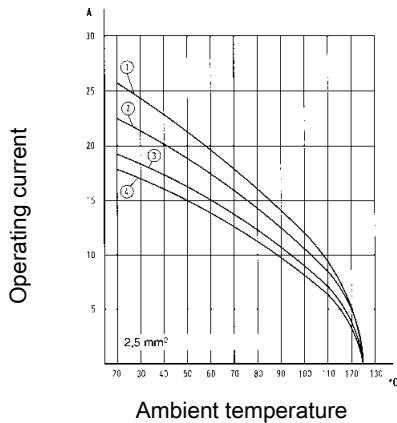

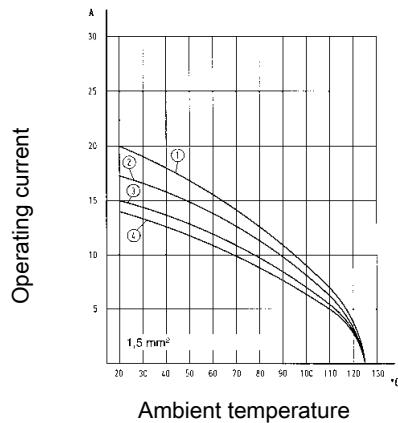

## Features

- Han E® HMC contacts with crimp termination
- Suitable for hoods/housings of series Han® B HMC
- Han E® HMC contacts available with special HMC gold plating for 10,000 mating cycles

## Current carrying capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

Measuring and testing techniques according to DIN EN 60 512-5

## Features

- Blind mating connector system for drawer systems
- Direct panel mounting without housing
- Very robust design
- Solid pre-leading guid pins and float bushes
- Can be fixed with standard M4 screws
- Designed for 10,000 mating cycles

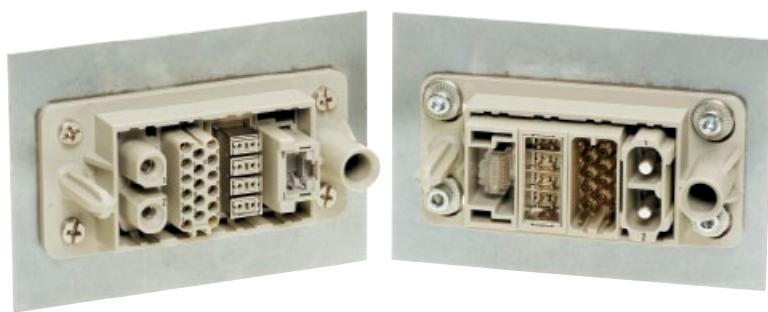

### Notice:

Due the plastic material used in the docking frame without PE, the panel will need to be grounded separately

## Features

- Suitable for Han E® HMC crimp contacts
- Standard module for power up to 40 A
- Designed for 10,000 mating cycles with Han E® HMC crimp contacts and only with Han-Modular® Docking frame

## Current carrying capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

## Features

- Suitable for Han E® HMC crimp contacts
- designed for a high working voltage up to 830 V
- finger safe male and female contacts
- Designed for 10,000 mating cycles with Han E® HMC crimp contacts and only with Han-Modular® Docking frame

## Technical characteristics

Specifications DIN EN 60 664-1

### Current carrying capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

Measuring and testing techniques according to  
DIN EN 60 512-5

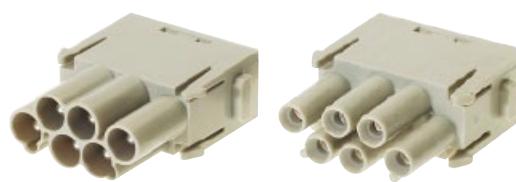

① 24 B HMC hoods/housings with 6 modules; wire gauge: 1.5 mm<sup>2</sup>

## Features

- Suitable for Han E® HMC crimp contacts
- High contact density
- Up to 16 A per contact
- Also suitable as a reliable signal connector
- Designed for 10,000 mating cycles with Han E® HMC crimp contacts and only with Han-Modular® Docking frame

## Technical characteristics

Specifications DIN EN 60 664-1  
DIN EN 61 984

### Current carrying capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

## Features

- Suitable for Han D® HMC crimp contacts
- High contact density
- Designed for 10,000 mating cycles with Han® D HMC crimp contacts and only with Han-Modular® Docking frame

## Technical characteristics

| Contact resistance | $\leq 3 \text{ m}\Omega$     |
| Crimp terminal     |                              |
| - mm <sup>2</sup>  | 0.14 ... 2.5 mm <sup>2</sup> |
| - AWG              | 26 ... 14                    |

### Current carrying capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

Measuring and testing techniques according to  
DIN EN 60 512-5

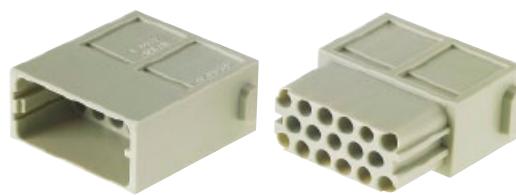

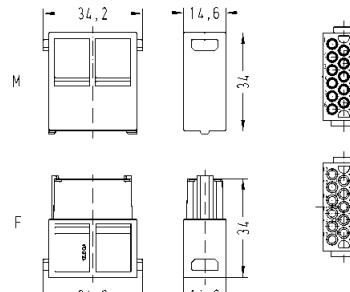

① 24 B HMC hoods/housings with 6 modules; wire gauge: 1.5 mm<sup>2</sup>

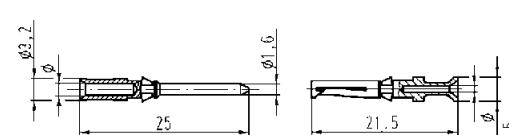

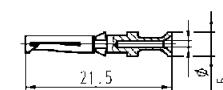

② 24 B HMC hoods/housings with 6 modules; wire gauge: 1.0 mm<sup>2</sup>

## Features

- Suitable for all inserts of the series Han D® HMC, Han E® HMC, Han® EEE HMC and Han DD® HMC
- Ideal for applications in the field of transportation, as well as in the printing industry
- Due to the floating system of the docking frame the PE connection of the mounting base has to be installed separately
- Inserts are protected against mechanical damage
- Designed for 10,000 mating cycles

## Technical characteristics

## Features

## Technical characteristics

- Suitable for HARTING LC contacts
- For GI-Fibre 50 - 62.5 / 125 µm and for single mode fibre
- Using of guiding pins (male and female) is obligatory

## Inserts

## Features

- Screw connection, suitable for all users around the world
- Field assembly without special tools
- For flexible and solid conductors from 0.5 to 2.5 mm<sup>2</sup>
- Additional protection against voltage and accidental contact by a sliding insulation cover that closes automatically during mating

## Technical characteristics

Specifications DIN EN 60 664-1  
DIN EN 61 984

## Features

- Blind mating connector system for drawer systems
- Direct panel mounting without housing
- Very robust design
- Solid pre-leading guide pins and float bushes
- Can be fixed with standard M4 screws

### Note:

Due to the plastic material used in the docking frame without PE, the panel will need to be grounded separately.

## Features

- Suitable for individual modules of the series Han-Modular® in control cabinets, distribution etc. as cable-to-cable connection
- Strain relief provided by cable ties (max. width: 5 mm)
- Optional fixing due to two drill holes on the strain relief flange
- Easy mounting and removal of the modules (see Han-Modular® removal tool)

\*Delivery comprises one module clamp

## Features

- Suitable for rough industrial environments (degree of protection IP 65 with closed cover)
- Optimum locking (3 mm double bit or rotation knob)
- Safe opening (integrated spring, 30 degree opening and locking position in the cover)
- Worldwide use (see approvals)
- High quality plastics

It has a central circular access point and four mounting holes. The HARTING logo is embossed on the top surface.           |

## Features

- Heavy duty connector for D-Sub signal contacts
- Suitable for all Han® 3 A hoods/housing types: Standard (metal, plastic), EMC, INOX, M and HPR
- High contact density at small foot print
- Easy handling of signal connectors in industrial environment
- One preleading contact

## Current Carrying Capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

Measuring and testing techniques according to DIN EN 60 512-5

- ① wire gauge: 0.14 mm<sup>2</sup> stamped contacts  
 ② wire gauge: 0.25 mm<sup>2</sup> stamped contacts  
 ③ wire gauge: 0.5 mm<sup>2</sup> turned contacts

|                           |   |
|---------------------------|---|
| Material                  | copper alloy                                  |
| Surface                   | according to performance level                |
| - selectively gold plated |   |
| Crimp termination         |   |
| - mm <sup>2</sup>         | 0.09 mm <sup>2</sup> ... 0.56 mm <sup>2</sup> |
| - AWG                     | 28 ... 20                                     |

### Hoods/Housings

Detailed information and further hood/housing types see catalog "Industrial Connectors Han®", chapter 31

#### Plastic hoods/housings

|  |               |
|--|---------------|
| Material   | polycarbonate |
| Flammability acc. to UL 94   | V 0           |
| Degree of protection<br>acc. to DIN EN 60 529<br>for coupled connector | IP 67         |

#### Metal hoods/housings

|  |   |
|--|---|
| Material   | zinc die-cast   |
| Degree of protection<br>acc. to DIN EN 60 529<br>for coupled connector | IP 44<br>IP 67 is achieved with seal screw 09 20 000 9918 |

## Features

- High current inserts designed to fit all hoods/housings size Han® 3 A
- 4 coding options
- Use of standard Han® C crimp contacts
- Finger protected male and female contacts
- Pre-mating PE crimp contact

## Technical characteristics

### Tools

see chapter 99  
in the main catalogue  
„Industrial Connectors Han®“

### Hoods/Housings

Detailed information and further hood/housing types see catalogue „Industrial Connectors Han®“, chapter 31

#### Plastic hoods/housings

|  |               |
|--|---------------|
| Material   | polycarbonate |
| Flammability acc. to UL 94   | V 0           |
| Degree of protection<br>acc. to DIN EN 60 529<br>for coupled connector | IP 67         |

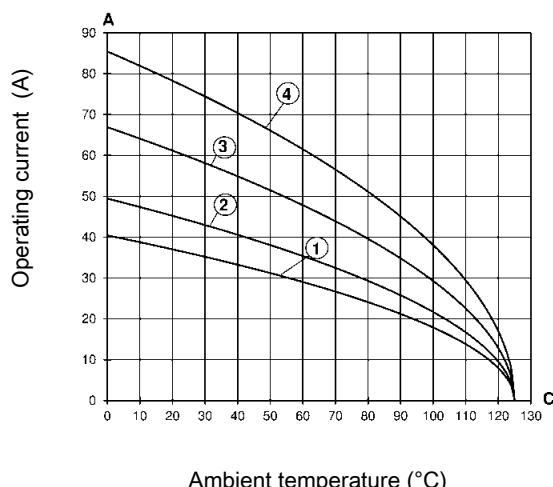

#### Metal hoods/housings

|  |   |
|--|---|
| Material   | zinc die-cast   |
| Degree of protection<br>acc. to DIN EN 60 529<br>for coupled connector | IP 44<br>IP 67 is achieved with seal screw 09 20 000 9918 |

## Current Carrying Capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

Measuring and testing techniques according to  
DIN EN 60 512-5

- ① wire gauge: 2.5 mm<sup>2</sup>
- ② wire gauge: 4 mm<sup>2</sup>
- ③ wire gauge: 6 mm<sup>2</sup>
- ④ wire gauge: 10 mm<sup>2</sup>

## Features

- Suitable for extreme environmental conditions
- Suitable for sensitive interfaces that have to be protected and shielded
- Robust metal version
- For sizes 6, 10, 16 and 24 with screw and toggle locking
- Captive cover due to fixing cord

## Features

- Flexible high-current interface
- Low mating and unmating forces
- Stackable due to modular design
- Suitable for HC 350 crimp contacts
- On-board removal tool

## Current carrying capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

Measuring and testing techniques according to  
DIN EN 60 512-5

① wire gauge: 35 mm<sup>2</sup>

② wire gauge: 95 mm<sup>2</sup>

HC Individual 3-poles

### 4 Variant 1

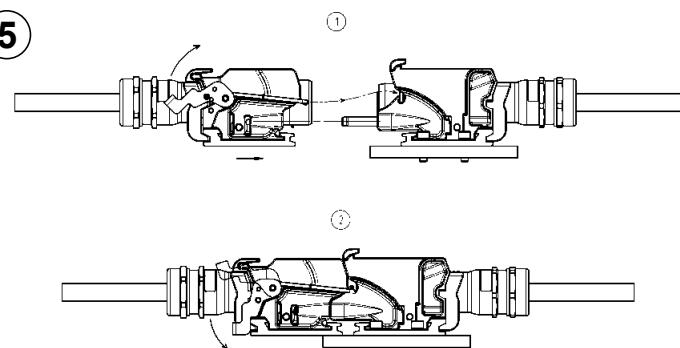

## Assembly and construction

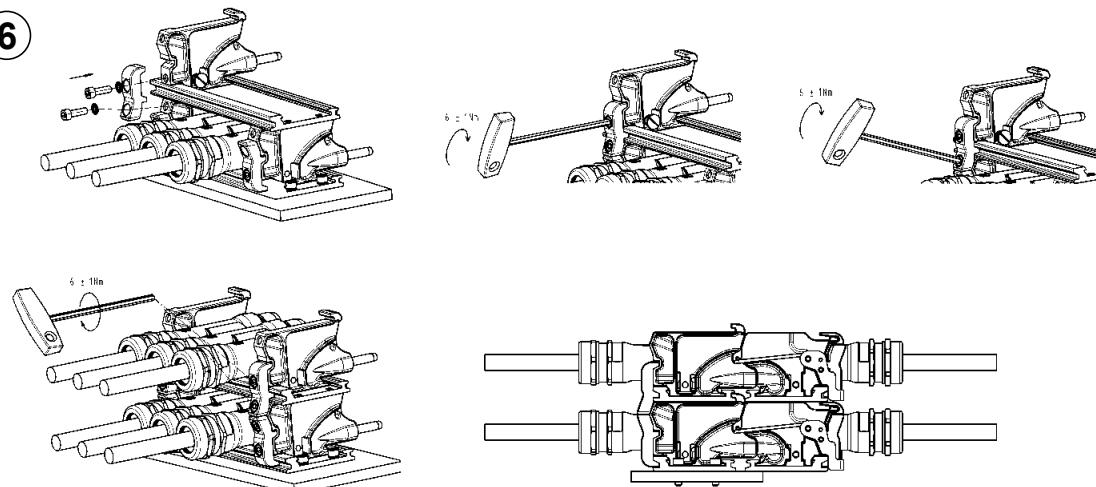

### 4 Variant 2

### 5

### 6

## Features

- Direct hall effect current sensor
- $I_{P\max} = 300 \text{ A} \dots 1000 \text{ A}$
- Galvanic insulation between primary and secondary current
- Panel mounting
- Housing material and potting mass have a flammability rating UL94 V0
- Standard EN 50 178: Electronic equipment for use in power installations

## Advantages

- High accuracy
- Wide measuring range
- High current overload capability
- Very low susceptance to external magnetic fields

## Technical characteristics

### HCSE 100

|          |                         |                           |
|----------|-------------------------|---------------------------|
| $I_{PN}$ | Nominal primary current | 100 A                     |
| $I_P$    | Measuring range         | 0 ... $\pm 300 \text{ A}$ |

### HCSE 300

|          |                         |                           |
|----------|-------------------------|---------------------------|

## Remarks

- If  $I_P$  flows in the direction of the Arrow  $I_{Sek}$  is positive
- Over currents ( $>I_{PN}$ ) or the missing of the supply voltage can cause an additional remaining magnetic offset
- The temperature of the primary conductor may not exceed 100 °C
- Protection degree of the standard interface is IP 20

- These sensors may only be used in electrical or electronic systems which fulfill the relevant regulations (Standards, EMC Requirements,...)

- Pay attention to protect non-insulated high-voltage current carrying parts against direct contact (e.g. with a protective housing)
- When installing this sensor you must ensure that the safe separation (between primary circuit and secondary circuit) is maintained over the whole circuits and their connections
- The sensor may only be connected to a power supply respecting the SELV/PELV protective regulations acc. to EN 50 178
- Disconnecting the main power must be possible

The Current Sensors support a Safe Separation. The creepage and clearance distances taken as a basis for the rated voltage are the shortest distance between the secondary connection and the transducer window. The actual rated voltage depends on the position of the primary conductor respectively on the actual distance between the primary conductor and the secondary connection

Crimping Tool for Han-Fast® Lock contacts

## Features

- Manual crimping tool for Han-Fast® Lock contacts for wire gauges of 4 mm<sup>2</sup>, 6 mm<sup>2</sup> and 10 mm<sup>2</sup>
- Integrated locator guarantees precise contact alignment
- Balanced grip force and optimised handle design
- Built in interlock to ensure a complete crimping cycle
- Easy exchange of crimp dies
- High quality crimping

# Han® Torque Tool Set

Part-Number: 09 99 000 0833

Han® Torque Tool Set for High Current Axial Screw Contacts

## Features

- Numerical, digital display of torque values
- Torque value can be set stepless by means of a torque-setter (included with delivery)
- Comfortable T-handle with soft zones for optimal torque transmission
- Audible click signal when the pre-set torque value has been attained
- Including factory calibration certificate
- Interchangeable blades made of high quality chrome-vanadium-molybdenum steel

## Technical characteristics

- Tightening torque is variable between 5 and 14 Nm
- Torque accuracy:  $\pm 6\%$
- Specifications: EN ISO 6789, BS EN 26789, ASME B107.14M.
- Dimensions: 273 x 153 mm (Length x Width)

## Included with the set

- High quality metal box
- Variable tightening torque tool TorqueVario®-STplus\*
- Setting tool: torque-setter
- HARTING optimised interchangeable blades hexagonal SW 4 and SW 5

## Suitable for HARTING products

- Han® 200 A Axial module
- Han® 100 A Axial module
- Han® 100 A single module
- Han® K 3/0
- Han® K 3/2
- Han® K 6/6 (power contacts)
- Han® K 8/0 (power contacts)
- Han® HC Modular 350 Axial (up to 95 mm<sup>2</sup>)

\* TorqueVario® is a registered trademark of Wiha Werkzeuge GmbH

# Han® Torque Tool Set

Part-Number: 09 99 000 0834

Han® Torque Tool Set for Power Contacts

## Features

- Torque value can be set via window scale
- Torque value can be set stepless by means of a torque-setter (included with delivery)
- Ergonomic multi-component handle, particularly light and compact
- Audible click signal when the pre-set torque value has been attained
- Including factory calibration certificate
- Interchangeable blades made of high quality chrome-vanadium-molybdenum steel

## Technical characteristics

- Tightening torque is variable between 1 and 5 Nm
- Torque accuracy:  $\pm 6\%$
- Specifications: EN ISO 6789, BS EN 26789, ASME B107.14M.
- Dimensions: 273 x 153 mm (Length x Width)

## Included with the set

- High quality metal box
- Variable tightening torque tool TorqueVario®-S\*
- Setting tool: torque-setter
- HARTING optimised interchangeable blades hexagonal SW 2 and SW 2.5
- Torque bit universal holder
- Bits: SW3, SW4 , P 0, PH1, PH2, T10, T15, T20, slot 0.6 x 4.5, slot 0.8 x 4.5

## Suitable for HARTING products

- Han® 70 A Axial module
- Han® 40 A Axial module
- Han® C Axial module
- Han® C Axial module
- Han® K 4/4 (power contacts)
- Han® K 6/12 (power contacts)

\* TorqueVario® is a registered trademark of  
Wiha Werkzeuge GmbH

# Han® Torque Tool Set

Part-Number: 09 99 000 0835

Han® Torque Tool Set for HARTING Screw Contacts and Fixing Screws

## Features

- Precise torque value by means of a fixed torque value pre-set by the manufacturer
- Ergonomic multi-component handle, particularly light and compact
- Audible click signal when the pre-set torque value has been attained
- Including factory calibration certificate
- Interchangeable blades made of high quality chrome-vanadium-molybdenum steel

## Technical characteristics

- Fixed torque value: 0.5 and 1.2 Nm
- Torque accuracy:  $\pm 6\%$
- Specifications EN ISO 6789, BS EN 26789, ASME B107.14M.
- Dimensions: 273 x 153 mm (Length x Width)

## Included with the set

- High quality metal box
- Two pre-set tightening torque screwdrivers TorqueFix®\*
- Interchangeable blades PH1, PH2, slot 0.5 x 3.0

## Suitable for HARTING products

- Han® 10 A – 32 A
- Han D® AV, Han E® AV,
- Han® K 6/6, K 6/12 (signal)
- Han® E
- Han Hv E®
- Han® HsB
- Han® fixing screws
- Han® PE contact: Han A®, Han E®, Han D®, Han DD®, K 8/24, K 6/6, K 8/0

\* TorqueVario® is a registered trademark of Wiha Werkzeuge GmbH

# Han® VDE Screw Driver Set

Part-Number: 09 99 000 0836

## Han® VDE Screw Driver Set

### Features

- Safety when working with loaded equipment up to 1.000 V AC
- Tool complying with IEC security standards
- High quality chrome-vanadium-molybdenum steel, through-hardened, chrome-plated
- Protective insulation moulded directly onto the bit
- Ergonomic SoftFinish®\* multi-component handle with roll off protection

### Technical characteristics

- Specifications: DIN ISO 2380, DIN ISO 8764, manufactured acc. to IEC 60900:2004

- Dimensions (Tool length x diameter):  
0.4 x 2.5: 179 x 23 mm  
0.5 x 3.0: 204 x 23 mm  
0.6 x 3.5: 204 x 23 mm  
1.0 x 4.5: 236 x 30 mm  
PH1: 191 x 23 mm  
PH2: 218 x 23 mm

### Range of delivery

- SoftFinish®\* electric slim bit screw driver:  
0.4 x 2.5, 0.5 x 3.0, 0.6 x 3.5, 1.0 x 4.5
- SoftFinish®\* electric Phillips screw driver:  
PH1, PH2,

### Suitable for HARTING products

- Han® A
- Han Star®
- Han® D® AV, Han E® AV,
- Han® K 6/6, K 6/12 (signal)
- Han® E, Hv E®, Han® HsB
- Han® fixing screws
- Han® K 4/0 K 4/2 K 4/8 screw contacts
- Han® PE contacts: Han A®, Han E®, Han D®, Han DD®, K 8/24, K 6/6, K 8/0

\* SoftFinish® is a registered trademark of Wiha Werkzeuge GmbH

## Notes

## Ha-VIS Middleware

### Advantages

### General Description

- Easy integration of HARTING RFID Reader
- Collecting any kind of tag information
- Filtering, grouping and aggregation based on various tag information
- Application flow triggered by manual, digital IO or scheduled events
- Report of cumulated data in standardized or customized formats
- Central RFID Reader management
- Advanced reading, writing, locking and muting of RFID transponders
- Import of data e. g. passwords from different sources like caches, association table or random values is supported
- Conform to EPCglobal® ALE 1.1.1 standard

The HARTING Ha-VIS Middleware is the intelligent software bridge between RFID Hardware and your company application. Scalable number of RFID Reader can easily be connected and configured. The connection is done with the connectors. Via configuration the Ha-VIS Middleware can filter, consolidate and group the raw data. The subscribers deliver the customized data to different sources/formats e. g. to files, databases or programmable interfaces. With the interface bidirectional interaction with the TAGs is easily realizable. The Ha-VIS Middleware Management is a client-software developed for configuration and management of the Middleware. For optimal functionality, the Ha-VIS middleware is delivered with service contract and training.

| Identification  | Part number  | Drawing  | Dimensions in mm |

If you only order the middleware (part no. 26 99 210 1110 00) you receive the middleware, the XML subscriber and a connector for one Ha-VIS RF-R500 RFID reader.</p> <p>For example, you order the middleware and an additional connector for the Ha-VIS RF-R500 with up to 15 reader, you are allowed to use 16 reader in total.</p> |                  |

\* available quarter 3/2013

## Technical characteristics

### Functionality

- Simple connection and integration of HARTING RFID reader
- Data filtering, aggregation and grouping based on various tag data like PC, TID, user memory bank and user defined primary key.
- Easy reporting of new, current and deleted tags.
- Reducing the appearance of tags moving in and out of the reader field. (Tag Smoothing)
- Management of complex reader hierarchies with composite reader and antenna restriction support.
- Supporting read, write, lock and kill operations according to EPC Class-1 Generation-2
- Different ways to trigger report generation
  - On occurrence of digital Input and Output events.
  - On http trigger events.
  - Time controlled like time interval, time period or specific point of time.
  - Tag controlled like no new tags, first tag occurred or specific amount of processed tags.
- Easy management and configuration access with Ha-VIS Middleware Management

### System requirements

- Operating System
  - Microsoft® Windows Server 2008 R2 64 Bit (recommended) or Windows 7 64 Bit
- Software
  - Microsoft® .NET 3.5
- Minimum hardware
  - Processor: 2 GHz 64 Bit Dual-Core
  - RAM: 4 GB or more
  - Disk space: 64 GB or more

(Recommended hardware depends on customer application)

### Architecture and concept

#### Middleware:

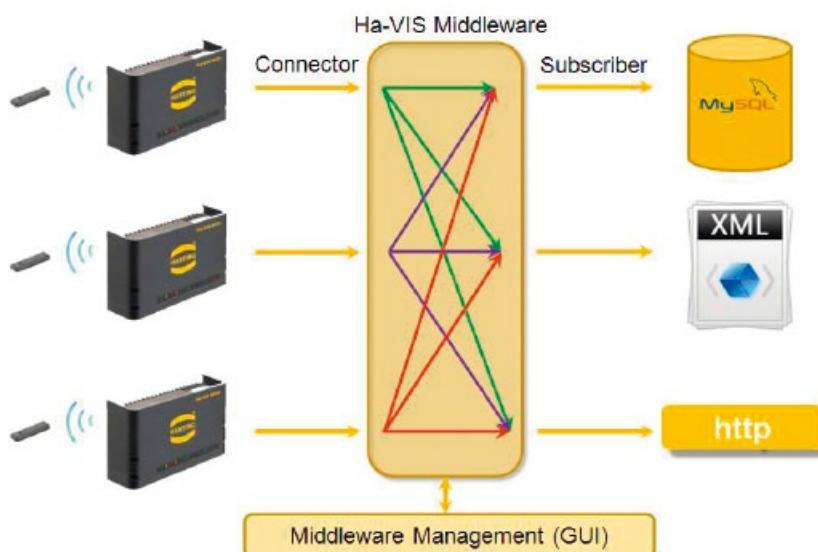

The middleware is the central data handling unit. Within the middleware, the data delivered from the connectors is filter, aggregated and grouped. The handled data can be consolidated and enriched with additional information.

#### Connector:

The connector bundles the full communication with the physical device. Changes in the hardware are fully handled by the connector without implications for the middleware. For every type of RFID reader, a different connector is needed.

#### Subscriber:

The subscriber delivers reports of the data processed by the middleware. There are different subscribers available for different output formats (e.g. XML). If a direct communication with another software is needed the http subscriber can be used.

## Ha-VIS RFID RF-R200 Reader

### Advantages

- One internal antenna (up to 30 cm)
- One external antenna (SMA)
- Flexible through large external antenna portfolio
- Power over Ethernet
- For distributed identification points
- Small size and DIN rail mounting
- Easy integration in machines or cabinets

### General Description

The Ha-VIS RF-R200 is a cost-efficient mid range reader licensed according to ETSI, FCC und IC.

Due to its very compact design, the Ha-VIS RF-R200 is best suited for integration in machines as well as office applications

#### Characteristics:

- very compact
- can easily be integrated in machines
- internal antenna for applications with limited space
- one external antenna makes numerous application possible
- 0.5 W transmission power
- Power over Ethernet

## Ethernet Switch

### Ha-VIS mCon 3000 Next Generation

Ethernet Switches, managed,  
for mounting onto top-hat mounting rail  
in control cabinets

## General Description

The fully Managed Ethernet Switches of the product family Ha-VIS mCon 3000 enable the connection of up to 10 network devices (according to type) over RJ45 ports or SFP modules on lowest area.

Degree of protection, mechanical stability and the comprehensive management software provide for high operation safety and meet highest demands.

The Ha-VIS mCon 3000 Ethernet Switches are designed for an effective, industrial and individual use.

The configuration via SD card or via the Multifunction button enables an easy and fast commissioning in the field.

Comprehensive possibilities of configuration and diagnostic are provided easy via web interface or standardized via SNMP.

The Ethernet Switches of the Ha-VIS mCon 3000 Next Generation family can be used as PROFINET IO devices.

## Features

- Full managed Ethernet Switch acc. to IEEE 802.3
- Up to 10 ports, managed, non-blocking
- Store and Forward Switching Mode
- Gigabit Uplink ports, RJ45 and SFP modules
- Auto-crossing, Auto-negotiation, Auto-polarity
- Temperature range -40 °C ... +70 °C
- PROFINET IO device
- Time synchronization via IEEE 1588v2
- Multifunction button for fast commissioning
- SD card slot for storage of the configuration
- Management functions see pages 120 and 121

## Advantages

- Small, robust metal housing
- External SD card for storage of the configuration
- Individual pre-configuration via Multifunction button
- Fast removable Ethernet data links via SFP „Hot-Swap“
- Optimised DIN rail fitting
- EMC, temperature range and mechanical stability meet the highest demands
- Universally applicable: PROFINET, Ethernet/IP or profile neutral

## Application fields

- Industrial automation
- Automotive industry
- Wind power, Solar Power
- Maritime

## Technical characteristics

### Ethernet interface RJ45

**Number of ports**

|                        |   |
|------------------------|---|
| Ha-VIS mCon 3080-A     | 8x 10/100Base-T(X)  |
| Ha-VIS mCon 3102-AASFP | 8x 10/100Base-T(X)<br>2x 10/100/1000Base-T(X) (Combo ports with SFP slot) |

**Cable types according to IEEE 802.3**

Shielded Twisted Pair (STP) or Unshielded Twisted Pair (UTP), Category 5

**Data rate**

10 Mbit/s, 100 Mbit/s or 1000 Mbit/s (RJ45)

**Maximum cable length**

100 m (Twisted Pair; with Category 5 cable acc. to DIN EN 50 173-1)

**Termination**

RJ45 (Twisted Pair)

**Diagnostics (via LED)**

- Status Link – Green
- Data transfer (Act) – Green flashing
- Data transfer rate (Speed) – 1000 Mbit/s: Green  
100 Mbit/s: Yellow  
10 Mbit/s: OFF

**Topology**

Ring, Line, Star or mixed

### Ethernet Interface SFP (mini-GBIC) Fibre Optic and copper

**Number of ports**

|                        |   |
|------------------------|---|
| Ha-VIS mCon 3102-AASFP | 2x 100/1000Base (Combo ports with SFP slot) |
|------------------------|---|

**Data rate**

100 Mbit/s, 1000 Mbit/s

**Termination**

SFP modules according to MSA (Multi Source Agreement)  
(see catalogue „HARTING Ethernet Network Solutions Automation IT“)

**Diagnostics (via LED)**

- Status Link – Green
- Data transfer (Act) – Green flashing

### Power supply

**Nominal input voltage**

24/48 V DC ---

**Termination**

5-pole screw terminal, pluggable  
for redundant power supply

### Switch

**Diagnostics (via LED)**

- Devive operates without failures – Green
- Power supply in the admissible range – Green
- Low voltage – Red
- Diagnostics failure – Red
- PROFINET failure / diagnosis – Red/Green flashing

### Configuration

**Slot for SD cards (back side)**

- Saving and loading of configuration files
- Licence management for MRP

**Multifunction button**

Individual pre-configuration of software functions

### Management software

Full managed via web interface and SNMP  
Range of functions and detailed description see pages 120 and 121

**Ethernet Switch**
**Ha-VIS mCon 3080-A**

8-port Ethernet Switch, full managed  
for mounting onto top-hat mounting rail in control cabinets

Managed

IP 30

PROFINET compatible EtherNet/IP compatible 

Number of ports, Copper / Termination 8x 10/100Base-T(X) / RJ45 (Twisted Pair)

Nominal input voltage range 24/48 V DC ---

Permissible range (min/max) 12 V ... 60 V DC ---

Termination 5-pole screw terminal, pluggable redundant power supply

Input current approx. 130 mA (at 24 V ---)

Housing material Aluminium, anodized

Dimensions (W x H x D) 44 x 130 x 100 mm (without connectors)

Weight approx. 0.450 kg

Operating temperature -40 °C ... +70 °C

MTBF 678.372 h

Approvals (in preparation) UL 508; UL 60 950-1; DNV

Management fully Managed via Web interface and SNMP  
Functions see pages 120 and 121

## Accessories

### Ha-VIS Memory cards

The HARTING SD cards are used for saving the switch configuration. The web interface can be used to save the current configuration to the SD card.

If an SD card is inserted in the back of the switch, the switch will use the configuration saved on the card when it boots.

So it's quite easy when replacing a switch to transfer the entire configuration to the new switch. The old SD card with your current configuration is simply pushed into the new switch which then boots with these settings. No special network expertise is required.

**Note:** The HARTING Ethernet Switches are not compatible with conventional memory cards.

MRP memory cards allow you to activate the MRP functionality (media redundancy protocol) when using switches from the FTS 3000 and mCon 3000 series (with firmware ver. 3.0.0.1 and later). For example, in order to operate the device as an MRP slave, you need only have the corresponding MRP slave card inserted during operations.

Operating temperature      -40 °C ... +70 °C

Memory space      128 MB

### SD Memory cards

| MRP Master           | 20 89 900 1002 |

## Accessories

### Ha-VIS SFP modules

#### General description

SFPs (Small Form-factor Pluggable) are small standardized modules for network connections.

These modules are a specification for a new generation of modular optical transceivers. The devices are constructed as connecting plugs for extremely quick network connections.

The SFPs are available in a variety of models, depending on the cable type (multi-mode or single-mode), the wave length (850 nm, 1300 nm, 1550 nm or CWDM), data rate or range.

Copper-based SFP are also available.

#### Features

- Highly flexible
- Easily swapped out in event of malfunction
- Hot swappable
- Variants:

|             | SM fibre | MM fibre |
|-------------|----------|----------|
| 100 Mbit/s  | X        | X        |
| 1000 Mbit/s | X        | X        |

#### Advantages

- SFP used as connecting plug for extremely quick network connections
- Standardized modules for network connections

#### Application fields

- Railway applications
- Industrial automation
- Automotive industry
- Wind power

**Current carrying capacity**

The current carrying capacity is limited by maximum temperature of materials for inserts and contacts including terminals. The current capacity curve is valid for continuous, non interrupted current loaded contacts of connectors when simultaneous power on all contacts is given, without exceeding the maximum temperature.

Control and test procedures according to DIN IEC 60512

Conductor material \_\_\_\_\_ Copper tinned  
 Gauge \_\_\_\_\_ AWG 28/7 0.089 mm<sup>2</sup>  
 Voltage rating \_\_\_\_\_ 300 V<sub>r.m.s.</sub>  
 Current rating \_\_\_\_\_ 1.3 A  
 Capacity unbalanced \_\_\_\_\_ 42.6 pF/m at 1 MHz  
 Impedance unbalanced \_\_\_\_\_ 100 Ω  
 Inductance \_\_\_\_\_ 0.56 μH/m  
 Propagation delay \_\_\_\_\_ 4.8 ns/m  
 Insulation material \_\_\_\_\_ Non-halogenated flame retardant Polyolefin  
 Temperature rating \_\_\_\_\_ -40 °C ... +80 °C  
 Insulation resistance \_\_\_\_\_ 10000 MΩ/km

Ha-VIS data bus cable  
2-wire, elastic

## Advantages

- Halogen free
- Electron-beam cross-linked cable
- Improved fire performance
- High resistance to temperature
- Conform to MVB standard according IEC 61375-3-1

## Applications

For fixed and moveable installation inside and outside of rail vehicles and buses. For symmetrical signal and data transmission with impedance of 120 Ohm. Suitable for use in MVB (Multifunction Vehicle Bus) as part of the TCN (Train Communication Network). Especially designed for termination with HARTING D-Sub InduCom and Han-Quintax® and other railway-specific Han® connectors and housings.

### Identification

### Part No.

Ha-VIS data bus cable  
2-wire, elastic

#### Sheath material:

Elastomer, electron-beam cross-linked,  
COMP 603

Color: black

Nominal voltage: 300 V

#### Testing voltage:

conductor/conductor 2 kV AC  
conductor/shielding 2 kV AC

Maximum conductor  
resistance at 20 °C: < 40.1 mΩ / m

Impedance at  
0.75 – 3 MHz: 120 Ω ±12 Ω

Transfer impedance  
at 20 MHz: ≤ 20 mΩ / m

#### Attenuation:

|        |              |
|--------|--------------|
| 1 MHz: | ≤ 12 dB / km |
| 3 MHz: | ≤ 17 dB / km |
| 4 MHz: | ≤ 22 dB / km |

#### Maximum conductor temperature:

|                 |                   |
|-----------------|-------------------|
| fixed installed | -40 °C ... +90 °C |
| short circuit   | +160 °C           |

#### Minimum bending radius:

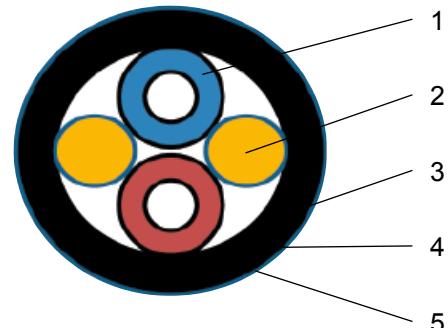

fixed installed > 6 x diameter

Cable sheath diameter: (Ø 7.8 ± 0.2) mm

Cable weight: 77 kg / km

100 m ring  
500 m drum

09 45 600 0160  
09 45 600 0170

#### 1. Pair

Conductor: tinned copper strands according to VDE 0295 / IEC 60228 class 5 construction 16 x 0.20 mm, Ø 0.85 mm

Insulation: Polyethylene (PE), electron-beam cross-linked, Comp 655 Ø 2.85 mm

colors: red, blue

#### 2. Filler

#### 3. Wrapping

Plastic tape

#### 4. Shielding

Tinned fine copper braid, Ø 6.4 mm

#### 5. Jacket

Elastomer electron-beam cross-linked Comp 603, Ø 7.8 mm

Color: black

Ha-VIS data bus cable  
2-wire, elastic

## Advantages

- Halogen free
- Electron-beam cross-linked cable
- Improved fire performance
- High resistance to temperature
- Conform to UIC 558 standard
- Conform to WTB standard according IEC 61375-2-1

## Applications

For fixed and moveable installation inside and outside of rail vehicles and buses. For symmetrical signal and data transmission with impedance of 120 Ohm. Suitable for use in WTB (Wire Train Bus) as part of the TCN (Train Communication Network) according UIC 558.  
Especially designed for termination with HARTING D-Sub InduCom and Han-Quintax® and other railway-specific Han® connectors and housings.

### Identification

### Part No.

#### Ha-VIS data bus cable 2-wire, elastic

Sheath material:  
Elastomer, electron-beam cross-linked,  
COMP 603  
Color: black

Nominal voltage: 300 V

Testing voltage:  
conductor/conductor 2 kV AC  
conductor/shielding 2 kV AC

Maximum conductor  
resistance at 20 °C: < 26.7 mΩ / m

Capacitance at 1 MHz:

|              |              |
|--------------|--------------|
| wire/wire:   | < 65 pF / m  |
| wire/screen: | < 120 pF / m |

Impedance at  
0.75 – 3 MHz: 120 Ω ±12 Ω

Transfer impedance  
at 30 MHz: ≤ 30 mΩ / m

Attenuation:

|        |              |

09 45 600 0190

#### 1. Pair

Conductor: tinned copper strands according to VDE 0295 / IEC 60228 class 5 construction 24 x 0.20 mm, Ø 1.1 mm

Insulation: Polyethylene (PE), electron-beam cross-linked, Comp 655 Ø 3.9 mm

colors: black, white

#### 2. Filler

Polyolefine copolymer

#### 3. Wrapping

Plastic tape

#### 4. Shielding

Tinned fine copper braid, Ø 8.5 mm

#### 5. Jacket

Elastomer electron-beam cross-linked Comp 603, Ø 9.7 mm

Color: black

Ha-VIS data bus cable  
2-wire FOAM, elastic

## Advantages

- Halogen free
- Electron-beam cross-linked cable
- Improved fire performance
- High resistance to temperature
- Reduced outer diameter
- Conform to UIC 558 standard
- Conform to WTB standard according IEC 61375-2-1

## Applications

Primary for fixed but also moveable installation inside and outside of rail vehicles and buses. For symmetrical signal and data transmission with impedance of 120 Ohm. Suitable for use in WTB (Wire Train Bus) as part of the TCN (Train Communication Network) according UIC 558. Especially designed for termination with HARTING D-Sub InduCom and Han-Quintax® and other railway-specific Han® connectors and housings.

## preLink® Extender

## Application

- Structured cabling for industrial premises
- Extension of cables for data communication
- Connection of cables with different cross-sections
- Linking of fire compartments

## Advantages

- preLink® termination
- Simple, fast and reliable connection of data cables
- Flexible in the application
- Future proof, Category 6A, transmission rate up to 10 Gbit/s

## Identification

## Part No.

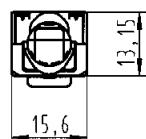

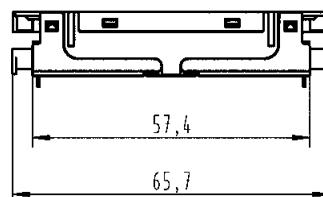

## Drawing

## Dimensions in mm

## preLink® Extender

Wire termination: Ha-VIS preLink®  
 Number of contacts: 8  
 Transmission: Cat. 6A  
 Transmission rate: 10 Gbit/s  
 Shielding: fully shielded 360°  
 flexible shielding  
 termination  
 Cable diameter: Ø 5 – 9 mm  
 Wire cross-section: AWG22 ... AWG27  
 Single  
 wire diameter: Ø 0.8 mm ... 1.6 mm  
 depending on  
 termination module  
 Degree of protection: IP 20  
 Operating  
 temperature range: -40 °C ... +70 °C  
 Housing material: zinc die-cast,  
 nickel plated

20 82 101 0001

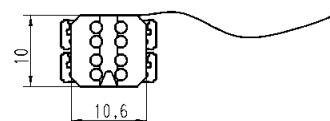

## preLink® terminal module

(package with 10 pcs.)  
 Contact block with IDC termination

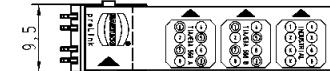

Number of contacts: 8

Wire cross-section: AWG 22/23 (24)  
solid and stranded

20 82 000 0001

Single wire diameter: Ø 1.3 – 1.6 mm  
Colour: yellowWire cross-section: AWG 26/27  
solid and stranded

20 82 000 0003

Single wire diameter: Ø 0.8 – 1.1 mm  
Colour: white

HARTING RJ Industrial® RJ45 jacks with transformer

## Advantages

- Compact design
- Integrated optical fibres
- Excellent EMC behaviour due to integrated transformers and filters for 10/100 Mbit or 1 Gbit Ethernet
- SMC compatible
- Versions from 10/100 Mbit up to 10 Gbit Ethernet and PoE

## Technical characteristics

horizontal with screw termination  
for reflow soldering  
pitch 3.50 / 3.81 mm

Drawing

Dimensions in mm

## Dimensions

$$L = \text{pitch} \times \text{poles}$$

$$a = \text{pitch} \times (\text{poles} - 1)$$

## Technical characteristics

## Technical data

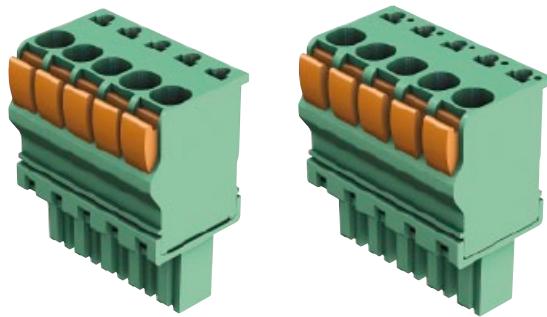

|   |                   |        |        |
|---|-------------------|--------|--------|
| Rated current                             | 12 A              |        |        |
| Pitch                                     | 3.50 mm / 3.81 mm |        |        |
| Surge voltage category / pollution degree | III/3 III/2 II/2  |        |        |
| Rated voltage                             | 150 V             | 150 V  | 300 V  |
| Rated surge voltage                       | 2.5 kV            | 2.5 kV | 2.5 kV |

## Material data

|                               |                    |
|-------------------------------|--------------------|
| Group of insulation material  | I                  |
| Type of insulation material   | PA / PPA           |
| Flammability rating per UL 94 | V0                 |
| Operating temperature         | -40 °C ... +110 °C |
| Contact material              | copper alloy       |
| Contact plating               | tin plated         |

## Conductor and solder pin data

|                                   |                                       |
|-----------------------------------|---------------------------------------|
| Connection technology wire        | screw termination                     |
| Conductor size solid / stranded   | 0.05 - 1.5 / 0.05 - 1 mm <sup>2</sup> |
| Conductor size AWG                | 28 - 16                               |
| Screw thread                      | M2                                    |
| Tightening torque                 | 0.2 - 0.25 Nm                         |
| Stripping length                  | 5 - 6 mm                              |
| Solder pin: drilled hole diameter | 1.1 mm                                |

## Solder pin data

Solder pin: drilled hole diameter 1.4 mm

You can find the **HARTING eCatalogue** at [www.HARTING.com](http://www.HARTING.com).

The screenshot shows the main navigation bar with links for Products, MyHARTING, Downloads / Catalogue order, and a search bar. Below the navigation is a grid of product categories:

- Industrial Connectors Han®**: Subcategories: Product list (2191)
- System cables and cable assemblies Han®**: Subcategories: Product list (71)
- Ethernet Switches and RFID**: Subcategories: Product list (98)
- Tools Han®**: Subcategories: Product list (66)
- Accessories Han®**: Subcategories: Product list (414)
- Board-to-Board Connectors incl. Tools, Accessories**: Subcategories: Product list (2067)

On the right side, there are two promotional boxes:

- Excellence components**: Product communication
- HARTING Global Website**: Subsidiary Location Website

Below the categories, sections for **Recently viewed** (no items) and **Recently searched** (no items) are shown. At the bottom, there's a footer with links to Home, Contact, Privacy Policy, Terms of Use, Sales and Delivery Conditions, and Imprint, along with social media icons for Facebook, Twitter, LinkedIn, YouTube, and Google+.

The **HARTING eCatalogue** is an electronic catalogue with a product configurator. Here you can choose a connector according to your requirements. Afterwards you are able to send your inquiry directly to a HARTING sales partner. The drawings to every single part are available in PDF format. The parts are downloadable in 2D format (DXF) and 3D format (IGES, STEP). The 3D models can be viewed with a VRML-viewer.

## Product configurator

The screenshot shows the product configurator interface for **Han® Connector Sets**. The left sidebar lists attributes for insertion:

- Gender**: Male contacts (selected)
- Series**
- Number of contacts**
- Size of housing/housing**
- Electrical data**
- Electric data for signal area**
- Termination**
- Pin / Screw type for housing**

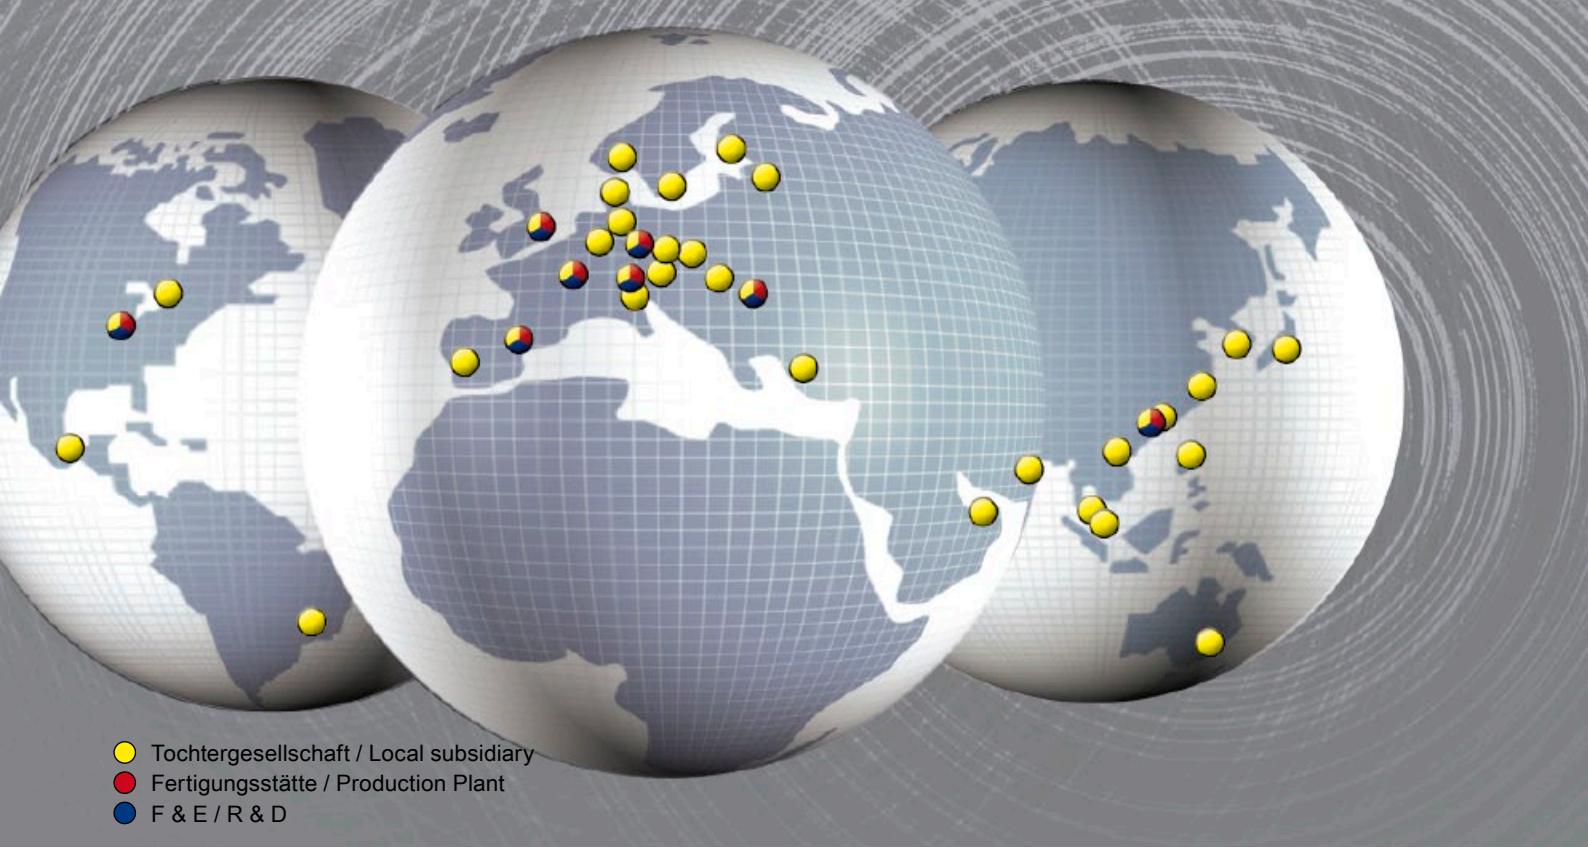

The right side shows a list of series options:

- Han A®
- Han-Brid® Cu
- Han-Brid® Firewire
- Han-Brid® Quntau 3 A
- Han-Brid® RJ45 C
- Han-Brid® USB
- Han-Com®
- Han D®, Han D® AV
- Han DD®
- Han E®, Han® ES/ESS, Han E® AV, Han® ES AV
- Han® EE
- Han® EEE
- Han® HS/B
- Han® HV E
- Han® Modular®
- Han® 3 A SC Module
- Han® Q
- Han® Q Data RJ45
- R15
- R23
- Stat®

A detailed description of the Hybrid Field Bus Connector is provided on the right:

Hybrid Field Bus Connector for shielded twisted pair (CAT 4 electrical contacts 30A + option for PELV electrical data up to 30 V DC & 10 A)

At the bottom, there's a footer with links to Home, Contact, Privacy Policy, Terms of Use, Sales and Delivery Conditions, and Imprint, along with social media icons for Facebook, Twitter, LinkedIn, YouTube, and Google+.
