LCD Flat Panel Processor with built-in MCU, NTSC/PAL/SECAM Decoder, T-CON and Analog RGB Support

TW8816

The TW8816 is a highly integrated multi-purpose LCD display solution for both analog and digital panels. To reduce BOM cost, TW8816 integrates an 8-bit MCU and a CCFL controller. Through multiple input ports, TW8816 can directly display video and graphic content from a variety of devices including TV Tuners, DVD players, back-up cameras, DTV/DMB receivers and navigation/GPS receivers.

Features

- Supports analog inputs including CVBS, S-Video, YPbPr & RGB signals and digital inputs including 24 bit RGB & 8/16/24 bit YCbCr. Interlaced and progressive ITU 601 inputs are supported.

- Supports digital panels up to WXGA resolutions

- Integrates cost saving features including a CCFL controller, charge pump booster, programmable panel offset control and on-chip 8 bit 8051 MCU with SPI interface

- Embedded Image Enhancement
  - Programmable CTI, hue, brightness, saturation, contrast & sharpness control
  - Black/White Stretch
  - Programmable favorite color enhancement- up to three colors
  - Programmable Gamma Correction tables

Features List

Analog Video Decoder

- NTSC (M, 4.34) and PAL (B, D, G, H, I, M, N, N combination), PAL (60), SECAM with automatic format detection

- Advanced synchronization processing for VCR trick play signal

- Three 10-bit ADCs and analog clamping circuit.

- Built-in analog anti-aliasing filter

- Fully programmable static gain or automatic gain control for the Y or CVBS channel

- Programmable white peak control for the Y or CVBS channel

- Software selectable analog inputs allows any of the following
  - Up to 4 composite video
  - UP to 3 S-Video
  - Up to 2 analog YPbPr and RGB

- 4-H adaptive comb filter Y/C separation

- PAL delay line for color phase error correction

- Digital PLL for both color and horizontal locking

- Programmable hue, brightness, saturation, contrast, sharpness, Gamma control, and noise suppression

- Automatic color control and color killer

- Detection of level of copy protection according to Macrovision standard

Analog RGB / YPbPr input

- Built-in sync processor for SOG support

- Built-in Line-locked PLL

- Built-in input measurement function

- Support directly sampling up to SVGA(50MHz).

Digital interface

- Allows connection to 8/16/24-bit RGB/YCbCr

- Support interlaced

- ITU 656, interlaced and progressive ITU 601.

TFT Panel Support

- Supports a variety of Digital single pixel TFT panels and Analog active matrix TFT panels
- Supports digital TTL panel up to WXGA(1280 x 768), 100MHz and analog panel up to WQVGA (480 x 234), 20 MHz
- Supports 3, 4, 6 or 8 bits per pixel format

Built-in Microcontroller

- Supports external SPI Interface and I2C Master interface with GPIO
- Supports 8 MCU GPIO
- Supports UART interface with GPIO
- Support IR or interrupt with GPIO

CCFL Controller

- Single channel CCFL controller based on push-pull architecture
- Lamp fault monitoring- Lamp Open, Lamp Over-current, Failure to Strike and Over-voltage
- Programmable Lamp Frequency to move EMI spurs out of band
- Analog or digital brightness control. 300:1 dimming range with the digital brightness control.
- Low power stand-by mode

OSD

- Built-in OSD controller with integrated character 202 ROM and programmable 227 RAM fonts.
- Multi-window (4) OSD support with color pallet
- 16 font & window colors available
- Support OSD overlay with alpha blending

Image Enhancement

- Programmable hue, brightness, saturation, and contrast controls.
- Sharpness control with vertical peaking
- Programmable
- CTI control
- Built-in de-interlacing engine
- Independent RGB gain and offset controls
- Panorama / Water-glass scaling
- YCbCr hue adjustment
- Programmable Gamma correction tables
- Programmable favorite color enhancement

Power Management

- Supports Panel power sequencing.
- Supports DPMS for monitor power management.
- 1.8 / 3.3 V operation

Timing Controller (TCON)

- Support programmable interface signals for control
- Column (source) driver / row (gate) driver

Miscellaneous

- Supports 2-wire serial bus interface
- Spread spectrum PLL
- Low-speed ADC for KEY scan
- Programmable panel VCOM offset control
- 5V tolerant I/O
- Power-down mode
- Typical power consumption < 500mW
- Single 27MHz crystal
