## Soldering profile:

Condition for Soldering

- The condition mentioned above is the temperature on the Cu foil of the PCB surface. There are cases where board's temperature greatly differs from switch's surface be used not to allow switch's surface temperature to exceed 260°C.
- Manual Soldering

| Soldering Temperature     | Max.350°C      |
|---------------------------|----------------|
| Continuous Soldering Time | Max. 5 seconds |

- Precautions in Handling
  - 1.Care should be exercised so that flux from the upper part of the printed circuit board does not adhere to the switch.
  - 2. Except for washable type do not wash the switch body.
  - 3.Please make sure that there is no flux rose over the surface of the PCB
