

# MU050I150BQI31

## Features

- 2 LED channels, 100% dimming Output Current can be set to from 200mA to 1500mA
- Soft light Dimming Range 0.1%~100%
- Support DALI Dimming
- Dim-to-off with Standby Power<0.3 W
- Constant Power Maximum is 50W
- Protection: OTP, SCP, NLP,OPP
- Mode of wiring: On both ends of wiring
- UL Class 2,IP20
- 5-year warranty

403 × 30 × 21mm

## Electrical Specifications

Rated input voltage range	100 - 277 V
Maximum input voltage range	90 - 305 V
Input voltage frequency	50 / 60 Hz
Leakage current	<750uA
Output voltage range	8 - 50 V
Maximum input power	<70W
Efficiency typical value ( 230V,50Hz,full loaded <sup>①</sup> )	85 -87 %
Power factor ( 230V,50Hz,full loaded <sup>①</sup> )	>0.95
Stand-by power consumption <sup>②</sup>	<0.3W
THD(230V,50Hz,full loaded <sup>①</sup> )	<10%
Start-up time ( 230V,50Hz,full loaded )	<0.5S
Start-up time ( 120V,50Hz,full loaded )	<1S
The maximum setup current precision	± 5%
Input inrush current	<15A
Dimming range	0.1 -100%
Withstand Voltage I/P-O/P	3750 V
Withstand Voltage I/P-FG	1875 V
Withstand Voltage O/P-FG	500V
Surge L/N-earth, L-N	2KV,1KV
Operating Temp., Humidity	-25℃~+65℃,20%~95%RH
Storage Temp.,Humidity	-40℃~+85℃,10%~95%RH
Lifetime	≥50000hours@Tc=78℃ at 120VAC input,100% load
Weight	360g
Reference dimension	403 × 30 × 21mm

## ■ Function Description

- DALI Standards

Comply with IEC62386-102(2.0), IEC62386-207. The group count of DALI address of the device is 1.

- SwitchDIM (with memory function)---push dimming

SwitchDIM means that you can use two lines to connect L and N to DA+ and DA- respectively, and add a switch in series to either of the two lines to complete the function of ON/OFF and dimming. Short press(<0.6s) can turn on/off the driver, and long press can adjust the dimming level. When several drivers are connected together and controlled by one switch, press the switch for 10s, all the drivers are dimmed to 50% at the same time.

- MCS technology

Connect Smartkey to the driver through MCS( Multifunctional Configuration Settings) ports. With MOONS' Configurator software, you can set the MAX current of the driver( each step is 1 mA),dimming curve type, group count of DALI address etc.Please refer to specification of Smartkey to get specific information.

- Temperature Detection

In order to protect the LED, the temperature of LED is detected by a NTC. When the temperature exceeds the point which can be set by Smartkey, the output current can be decreased automatically, but not less than 25%.

- Constant Output Power

The driver can satisfy the curve of constant output power within a large range of output current and voltage.

- Protection

Thermal Protection

When the temperature of the inside PCB exceeds 110℃ , output current will be decreased to 50%. And it can not recover until the temperature drops to 70℃ .

Short-circuit Protection

Once the output short-circuits, the output will be cut off automatically. Then the driver will try to restart every 4s.

No-load Protection

The driver operating with no load will not be damaged, and it will try to restart every 4s. So the driver supports hot plug in.

Over-Power Protection

If the total power exceeds 60W, the output current of each channel will decrease to 50% , and then the maximum output power is increased to 50W gradually.

- DALI Signal Abnormality

If the signal of DALI is abnormal, including open-circuit and short-circuit, the output will recover to the preset maximum value.

- Online Update

Use smart key to connect PC and the driver to update the firmware.

Please refer to the specification of Smart key.

- Daisy-Chain

DALI dimming ports has 2 groups of DA+ and DA-, which support daisy-chain.
