

Meets ANSI/ESD S20.20 tested per ANSI/ESD S1.1

Made from stainless steel, the durable premium performance metal wristband creates a reliable electrical contact to the user's wrist. The metal expansion bands are used for durability and comfort. Each link is covered with an insulative plastic cap. Use with single-wire coil cord with 4mm female socket snap (not included).

Properties	Typical Value
Metal	Stainless Steel
Elasticity	Expansion 1.5:1
