Power strips used within a patient care vicinity may be permanently attached so that it can only be removed with a tool. Choose the PSCLAMP for a safe and secure mounting solution.

For Patient-Care Vicinity – UL 60601-1 Medical-Grade Power Strip, 4 15A Hospital-Grade Outlets, Safety Covers, 15 ft. Cord

MODEL NUMBER: **PS-415-HGULTRA**

Full 60601-1 compliance, integrated locking safety covers and a 15 ft. cord make this medical-grade power strip ideal for all areas inside and outside of patient care vicinities.

Description

The PS-415-HGULTRA Medical-Grade Power Strip -- patent # 7,375,939 -- is the first power strip with full 60601-1 compliance and agency listing, making it ideal for standalone use in all patient care vicinities. This 120V, 50/60 Hz power strip features a NEMA 5-15P-HG hospital-grade plug and four NEMA 5-15R-HG hospital-grade outlets that include integrated locking safety covers.

A patented protection circuit guards against shock hazards by preventing power from reaching the unit's outlets in the presence of a fault. The protection circuit automatically resets itself and restores power once the fault threat is gone.

The power strip is protected by a patented antimicrobial powder coating with EPA-registered and FDA-compliant silver ionic technology. The antimicrobial surface protection is 99.9 percent effective in inhibiting the growth of bacteria, such as C. diff and MRSA, and reducing the risk of HAIs in hospitals and other medical environments. The coating meets the requirements of JIS Z 2801:2000, an international standard for evaluating efficacy in antimicrobial products.

Mounting tabs and flanges let you install the PS-415-HGULTRA on a wide variety of surfaces. The all-metal housing ensures safety and is guaranteed to last a long time in demanding environments.

With a switchless design that prevents accidental shutoff and a 15-foot power cord that can reach a distant power source, the PS-415-HGULTRA is a recommended replacement for all non-compliant power strips.
