# WIMA MP 3-X1

Metallized Paper (MP) RFI-Capacitors Class X1 in PCM 10 mm to 22.5 mm. Capacitances from 1000 pF to 0.15  $\mu$ F. Rated Voltages from 300 VAC to 500 VAC.

### **Special Features**

- Particularly high reliability against active and passive flammability
- Excellent self-healing as well as high voltage strength
- High degree of interference suppression due to good attenuation and low ESR
- For temperatures up to +110°C
- According to RoHS 2011/65/EU

### **Typical Applications**

Class X1 RFI applications to meet EMC regulations

- Capacitors connected to the mains between phase and neutral or phase and phase conductors
- High peak voltage applications, pulse peak voltage ≤ 4 kV

### Construction

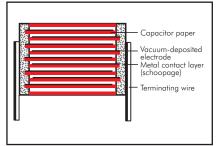

#### **Dielectric:**

Paper, epoxy resin impregnated

### Capacitor electrodes:

Vacuum-deposited

### Internal construction:

### **Encapsulation:**

Self-extinguishing epoxy resin, UL 94 V-0, metal foil

### Terminations:

Tinned wire.

### Marking:

Marking: Black on Silver.

### **Electrical Data**

### Capacitance range:

1000 pF to 0.15  $\mu$ F (E12-values on request) **Rated voltages:** 

300 VAC, 440 VAC, 500 VAC

Continuous DC voltage\* (general guide):

< 730 V for 300 VAC

≤ 850 V for 440 VAC and 500 VAC Capacitance tolerances: ±20%

Operating temperature range:

-40° C to +110° C

### Climatic test category:

40/110/56/C in accordance with IEC

Insulation resistance at +20° C:

 $\geq 12 \times 10^3 M\Omega$ 

Measuring voltage:

100 V/1 min. for 300 VAC and 440 VAC 500 V/1 min. for 500 VAC

### **Dissipation factors:**

 $\tan \delta \le 13 \times 10^{-3} \text{ at 1 kHz and } +20^{\circ} \text{ C}$ 

### Approvals:

Authority	Specification	Symbol	Approval-No.			
UL	UL 60384-14 CAN/CSA-E60384-14	<b>, 511</b> us	E 100438 (300 VAC)			

### Test specifications:

In accordance with IEC 60384-14

### Maximum pulse rise time:

Capacitance pF/ <b>µ</b> F	Pulse rise time V/µsec max. operation
1000 4700	2500
6800 0.022	1750
0.033 0.15	750

for pulses equal to a voltage amplitude

with  $\sqrt{2} \times 300 \text{ VAC} = 425 \text{ V}$ ,

with  $\sqrt{2} \times 440 \text{ VAC} = 623 \text{ V,}$ 

with  $\sqrt{2} \times 500 \text{ VAC} = 707 \text{ V}$ 

according to IEC 60384-14 **Test voltage:** 2300 VDC, 2 sec.

Reliability:

Operational life  $> 300\,000$  hours Failure rate < 1 fit (0.5 x  $U_r$  and 40° C)

### **Mounting Recommendation**

To minimize or avoid shock and/or vibration stresses to terminating wires and solder connections we recommend to fix voluminous resin-potted MP capacitors as from e.g. PCM 22.5 mm in an appropriate way since for constructional reasons they do not sit tight on the board.

\* If safety-approved EMI suppression capacitors are operated with a DC voltage being above the specified AC voltage rating the given approvals are no longer valid (IEC 60384-14).

Furthermore the permissible pulse rise time du/dt ( $F_{max}$ .) will be subject to a reduction according to

 $F_{\text{max.}} = F_{\text{r}} \times \sqrt{2} \times \text{UAC/UDC}$ 

if the DC operating voltage UDC is higher than  $\sqrt{2}\,x$  UAC

### **Packing**

Available taped and reeled.

Detailed taping information and graphs at the end of the catalogue.

For further details and graphs please refer to Technical Information.

# Recommendation for Processing and Application of Through-Hole Capacitors

### **Soldering Process**

Internal temperature of the capacitor must be kept as follows:

Polyester: preheating:  $T_{max.} \le 125^{\circ} \text{ C}$  soldering:  $T_{max.} \le 135^{\circ} \text{ C}$ 

Polypropylene: preheating:  $T_{max.} \le 100^{\circ} \text{ C}$  soldering:  $T_{max.} \le 110^{\circ} \text{ C}$ 

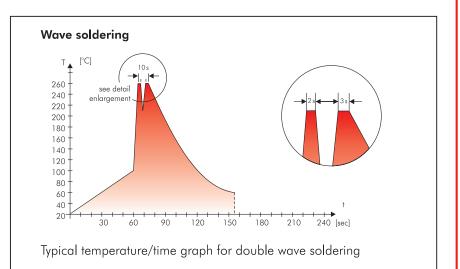

Single wave soldering

Soldering bath temperature: T < 260 ° C Dwell time: t < 5 sec

Double wave soldering

Soldering bath temperature:  $T < 260^{\circ}$  C Dwell time:  $\Sigma t < 5$  sec

Due to different soldering processes and heat requirements the graphs are to be regarded as a recommendation only.

### WIMA Quality and Environmental Philosophy

### ISO 9001:2015 Certification

ISO 9001:2015 is an international basic standard of quality assurance systems for all branches of industry. The approval according to ISO 9001:2015 of our factories by the infaz (Institut für Auditierung und Zertifizierung) certifies that organisation, equipment and monitoring of quality assurance in our factories correspond to internationally recognized standards.

### **WIMA WPCS**

The WIMA Process Control System WPCSI is a quality surveillance and optimization system developed by WIMA. WPCS is a major part of the quality-oriented WIMA production. Points of application during production process:

- incoming material inspection
- metallization
- film inspection
- schoopage
- pre-healing
- pin attachment
- cast resin preparation/ encapsulation
- 100% final inspection
- Testing as per customer requirements

### **WIMA Environmental Policy**

All WIMA capacitors, irrespective of whether through-hole devices or SMD, are made of environmentally friendly materials. Neither during manufacture nor in the product itself any toxic substances are used, e.g.

LeadPBB/PBDEPCBArsenic

etc.

CFC
 Hydrocarbon chloride
 Mercury

We merely use pure, recyclable materials for packing our components, such as:

- carton
- cardboard

- Chromium 6+

- adhesive tape made of paper
- polystyrene

We almost completely refrain from using packing materials such as:

- adhesive tapes made of plastic
- metal clips

### RoHS Compliance

According to the RoHS Directive 2011/65/EU as amended from time to time certain hazardous substances like e.g. lead, cadmium, mercury must not be used any longer in electronic equipment as of July 1st, 2006. For the sake of the environment WIMA has refraind from using such substances since years already.

Tape for lead-free WIMA capacitors

### **DIN EN ISO 14001:2004**

WIMA's environmental management has been established in accordance with the guidelines of DIN EN ISO 14001:2004 to optimize the production processes with regard to energy and resources.

Updated data on www.wima.com

<sup>\*</sup> for 2-inch transport pitches.
\* TPS (Tray-Packing-System). Plate versions may have different packing units. Samples and pre-production needs on request.

### -WIMA Part Number System

A WIMA part number consists of 18 digits and is composed as follows:

Field 1 - 4: Type description

Field 5 - 6: Rated voltage

Field 7 - 10: Capacitance

Field 11 - 12: Size and PCM

Field 13 - 14: Version code (e.g. Snubber versions)

Field 15: Capacitance tolerance

Packing Field 16:

Field 17 - 18: Pin length (untaped)
